SEDAC’s mission is to reduce the energy footprint of the State of Illinois. We support the University of Illinois’ land-grant mission to enhance the lives of citizens in Illinois through learning, discovery, engagement and economic development.

**Learning**

Though internships, courses, and workshops, SEDAC is training a new generation of design professionals to become leaders in clean energy.

**Discovery**

An applied research program, SEDAC conducts cutting-edge research to expand understanding of effective energy efficiency strategies.

**Engagement**

SEDAC offers technical assistance and education to individuals and communities to expand energy efficiency awareness and overcome implementation barriers.

**Economic Development**

SEDAC supports job creation by reducing operating costs through energy efficient design and by providing opportunities to learn innovative efficiency techniques.
