COMMUNITY SOLAR AND WIND GRANT PROGRAM

DCEO has just released a Request for Application for the Community Solar and Wind Grant Program to support the development and implementation of distributed community and commercial-scale solar thermal, solar photovoltaic, and wind energy technologies in Illinois. Applicants must be customers of an electric or gas utility that imposes the Renewable Energy Resources and Coal Technology Development Assistance Charge. These include ComEd, Ameren Illinois, Nicor Gas, Peoples Gas, North Shore Gas, as well as several energy cooperatives and municipal utilities.

Proposed projects are eligible for grants up to 30 percent of eligible project costs for business entities and 50 percent for local government and non-profit entities. The maximum grant award is $250,000. Eligibility is limited to project costs for the purchase and installation of solar and wind generation equipment, and related metering components as appropriate.

This RFA is a competitive solicitation, with applications due to DCEO on or before 4:30 p.m. on October 28, 2011. Program guidelines and application forms may be accessed from the Illinois Energy Office website.

SOLAR AND WIND ENERGY REBATE PROGRAM

The focus of the Solar and Wind Energy Rebate Program, through the State’s Renewable Energy Resources Program, is to encourage utilization of smaller-scale solar and wind energy systems in Illinois. DCEO is now accepting applications under the Solar and Wind Energy Rebate Program for Fiscal Year 2012.

Applications will be considered on a first come, first serve basis for the purchase and installation of smaller-scale solar and wind energy systems in Illinois. Eligible applicants include homeowners, businesses, public sector and non-profit entities who are customers of an electric or gas utility that impose the Renewable Energy Resources and Coal Technology Development Assistance Charge. These include ComEd, Ameren Illinois, Nicor Gas, Peoples Gas, North Shore Gas, as well as several energy cooperatives and municipal utilities. Approximately $1,5 of funding is available for this program for FY2012. For program guidelines and application forms, please click here.

The program offers incentives up to 30% of total project cost for residential and business applicants and up to 50% for public sector and non-profit entities. The maximum rebate is $30,000.

COMED BONUS LIGHTING INCENTIVES

ComEd Bonus Incentives are being offered for T12 to T8 upgrades. Upgrade your T12 fluorescent lighting now — Incentives will never be higher! Projects must be completed and final applications submitted by March 31, 2012. Information is available by pdf from the ComEd.
